Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: upon close review of the claims, the prior art, and applicant's remarks in the After Final Amendment filed on 10-24-2008, it appears that the allowance of claims 34-36, 41, and 45-48 are appropriate.

The prior art of Patsiokas, used in the outstanding final office action, discloses a portable audio device identifying an available non-interfering carrier frequency rather than '...a channel locator controller to identify an available non-interfering carrier frequency from an evaluation of two or more bands of FM carrier frequencies and an out-of-band transmitter to transmit a channel selection signal comprising the available non-interfering carrier frequency ...' as in claim 34; and '...a channel locator controller to identify an available non-interfering carrier frequency from an evaluation of two or more bands of carrier frequencies arranged on geoposition and an out-of-band transmitter to transmit a channel selection signal comprising the available non-interfering carrier frequency...' as in claim 41.

Further, it would be contrary to the teaching in Patsiokas to identify an available non-interfering carrier frequency from an evaluation of two or more bands of carrier frequencies and to transmit a channel selection signal comprising the available non-interfering carrier frequency since Patsiokas discloses a scanning receiver that identifies a radio frequency based on monitoring radio frequency channels that have no transmitted broadcast signals and have comparatively small signal strength.
